### EXPERIENCE & ACCOMPLISHMENTS

Ruby Life Inc. Canada

September 2016 – Present

#### Full Stack PHP Developer

- Contributed to product design and implementation discussions, pushed the envelope on speed to implement projects from the idea phase to production
- Tested and iterated code before and after production release, designed, maintained existing code base and implemented new functionalities in a TDD, Scrum, MVC, Linux/LAMP stack, Agile and SOA environment.
- Developed different responsive landers from scratch using different PHP and JavaScript application frameworks including Laravel, Contentful, NodeJS, JavaScript/JQuery, RESTful API, Handlebars.JS and Jade templating
- Maintained different modules (email notifications, loggings, signups, reCaptcha, translations, imaging and validations) of the applications using PHP, JavaScript/JQuery, HTML5, Twig, LESS, SASS for responsiveness and productivity
- Worked across the entire stack from database (MySQL, Redis) and backend (PHP) to the frontend (CSS, JS, HTML)

TELUS Communications, Canada

June 2016 – August 2016

#### PHP/WordPress Developer

- Assisted in the development of an internal employee portal for communications, messaging, blogging, and task scheduling purposes using CMS (WordPress), PHP, JavaScript/JQuery, Linux, Agile, Vagrant, SASS and MySQL
- Debugged application sections with debugging tools and PHP Unit in Netbeans, and ensured that quality build codes are checked into the repository using Git/Bash
- Participated in daily scrum meetings
- Developed custom WordPress plugins and responsive themes from scratch and making them multi-lingual.
- Created various responsive phases of the application portal with appropriate tests and checks including, quicklinks, blogs, footnotes, sidebars and other functions with high level of creativity and visual designs
- Internationalized and localized various modules of the application into French, English and other languages
- Involved in building an application module that sorts various tabular information using serialized data.

User In Mind, Canada

December 2015 – May 2016

#### Application Developer

- Assisted in the implementation of a staff scheduling application, built themes, plugins and gravity forms from scratch using WordPress (CMS), PHP, MySQL, JavaScript, REST APIs (Facebook and Twitter), Jenkins, CSS3, HTML5, Angular JS and Bootstrap
- Captured and implemented application level requirements by brainstorming with Project Managers, Team Leaders, and other Senior System Architects; worked in an Agile environment with daily scrum meetings.
- Prepared reports, manuals and documentations on the status and operations of a software for an online event scheduling application
- Developed different Web Applications from staging to live using ASP.Net/C#, PHP, CSS3, JavaScript, Ajax, WordPress and Twitter Bootstrap with emphasis on UI responsiveness for desktops, tablets and mobiles
- Corrected complex bugs and executed integration tests as per the project plan during web applications' developments.

CIO London, UK

**Web Solutions Developer**
